## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kim KR'533 in view of Simpson '097.

Kim discloses a hydrophilic polyurethane foam dressing, substantially as claimed. However, Kim doesn't disclose the density of the foam being 0.1 to 0.32g/cm<sup>3</sup>. Simpson teaches an open-cell polyurethane foam comprising a density of about 10 to about 50 pcf (approximately .1g/cm<sup>3</sup> to 0.32 g/cm<sup>3</sup>). It would have been obvious to one having ordinary skill in the art at the time that the invention was made that since Kim discloses the same material being the same sizes as the material of the present invention then the densities could also be the same. Also Simpson provides a teaching of forming the density of a polyurethane of the same density as the present invention.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. No additional art was cited in this office action.
